RE: Updated EASYACC.INI Initialization Files & Release of SAIG Host Communication Guide for Mainframe and Midrange Users v1.3

We are pleased to announce the availability of updated initialization files for the SAIG Mainframe/Midrange EasyAccess installation and a new release of the SAIG Host Communication Guide v1.3.

Updated EASYACC.INI Initialization Files:

Some of our users have already made these upgrades to their easyacc.ini file. You may choose to make these changes manually by editing your current easyacc.ini file or by downloading the new file to your system.
     The following parameters have been changed in the IDENTIFY section:

> AUTO_RETRY=Y
> MAX_RETRY=5
> RETRY_DELAY=120

The following parameter has been added to the SAIGPORTAL_DEFAULT_RECEIVEPARMS section:

> ASCII=Y

- Easyacc.ini in ASCII format is the initialization file for the following midrange systems:
  - ✓ AS400
  - ✓ All supported Unix systems
  - ✓ Sun Solaris
  - ✓ Open VMS
- Easyacc.ini in EBCDIC format is the initialization file for the following mainframe systems:
  - ✓ OS390 MVS

In the future, look for the easyacc.ini files to be bundled with the client installation of the software.

Updates to SAIG Host Communication Guide for Mainframe/Midrange User's v1.3:

- Overview section
- Section 3: Security – new tips for changing your password every 120 days
- Section 4: Communication Procedures – Query_List and Audit_Log
- Appendix A, B, and C - new samples added
- Appendix D: Trouble Shooting – new section

If You Need Further Information…

You may reach CPS/WAN Technical Support Monday through Friday, 7:00 a.m.–7:00 p.m. (CT), at 800/330-5947. You may also e-mail inquiries, comments, or suggestions to **cpswan@ncs.com**.
